# Introduction to TH Systems Pvt. Ltd

## About THS:

**TH Systems Pvt. Ltd** is a Indian and regional company that specializes in providing cutting edge digital centric solutions that truly help to transform companies, from Start Ups to Maturity stage entities, in addition to serving the Private & Public Sector organizations, via the home grown THS 360 Digital Platform,

- In an efficient
- In an effective
- In profitable manner

Backed and founded by highly qualified and experienced industry professionals and entrepreneurs, THS has its focus in providing World Class digital solutions that are compliant to International Standards and Guidelines, such as NMC, World Health Organization (WHO), ICD10/11, HL7, to name a few.

The key solutions offered by THS include its 'THS Platform', an end to end integrated Medical, Teaching Hospitals ERP with Clinical and Hospital Information System that goes beyond Colleges, Hospitals and enables and empowers captive markets and communities to not only perform healthcare screening and lifetime health records management but also, facilitates digital transformation within organizations including connectivity to mobile devices, internet of things (IoT), wearable tech, Business Intelligence and Data Analytics, among others.

Supported by a Centralized THS Helpdesk Hub, the company is able to not only provide much needed 360-degree support to its Indian client base but regionally and globally as well. With sub command centers in India, THS is able to accelerate its Research & Development, centered in Pune, India, backed by Tier 2 and Tier 3 level support from its associate command centers. This helps to position THS as a truly global digital solutions and services provider, with a lean workforce at the highest quality, giving optimal ROI to its Investors and Stakeholders.

# Introduction to TH Systems Pvt. Ltd

<b>Track Record:</b>
----------------------

- To date, The THS platforms has been deployed in one of the largest Medical college chain in state of Maharashtra, a Prominent Government Medical college, various Hospitals & Medical colleges in addition to being implemented via local partners in Indian & other countries among others.
- More than 10,000 beds, 5 million Health Records, thousands of Lab Orders and E-Prescriptions generated. We also have access to thousands of healthcare professionals, Pharmacies and other Closed Captive Markets that we are able to leverage on to commercialize successfully.
- Currently, we are also working out potential deployment in other regional countries. Coupled with these opportunities, THS Platform has also been identified for various implementations for Teaching Hospitals in India, including Digital Transformation possibilities of Government Medical Colleges, Clinics and Hospitals.
